## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. **Claims 1-27,44** are drawn to the structure of an echo canceller, classified in Class 379, subclass 406.01.
  - II. **Claims 28-43** are drawn to the structure of a device with voice control of the transmission direction, classified in Class 379, subclass 388.04.
  - III. **Claim 45** is drawn to the structure of a communications device with an ultrasonic link, classified in Class 379, subclass 56.1.

The inventions are distinct each from the other because of the following reasons:

2. Inventions I and II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. See MPEP § 806.05(d). In the instant case, invention I is an echo cancelling system for a bidirectional transducer, invention II is a communication device comprising non duplex operation (transmission direction switching), and invention III is an ultrasonic link in a communications device.

Art Unit: 2614

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
